Subject index of volume 34

Alkaline phosphatase 343
Antibody 221
– anti-idiotypic 43
– autologous 329
– bispecific 1
– derivatives 361
– monoclonal 37, 90, 97, 191, 198, 265, 294, 343, 377, 407
– polyclonal 377
– protective 63
Anti-CD5 24
Antigen 163
– common tumor-associated 53
– glycoprotein 377
– HLA 419
– K984 252
– LFA-1 407
– Thomsen-Friedenreich 294
– tumor-associated 377
Asialo-GM 221

B-cell 128
BCG 186, 283
– vaccine 306
BCNU 279
Bladder neoplasms 306
Bone marrow transplantation 97
Breast cancer 424
Burkitt lymphoma 123

Chemical weapons 389
Chemoimmunotherapy 279, 383
Chemotherapy 321
– low-dose 79
Cyclophosphamide 74
Cytolysis 74
Cytokines 241, 424
– network 299
Cytotoxic
– activities 414
– effector cells 321
– sensitivity 128
– T lymphocytes 419
Cytotoxicity 175, 198, 272, 377, 393
– antitumor 79
– cellular 9, 361
– NK 299
– T cell line 53

Drug inhibition 228

Early pregnancy factor 265
Epidermal growth factor receptor 37
Etoposide phosphate 343

FcγR 361
Fibrosis 211
5-Fluorouracil 17

Glioma 349, 370
Graft-versus-host disease
– acute 97
Growth factor
– epidermal – receptor 37, 370
– transforming-β 241
Growth modulation 355

Head and neck squamous cell carcinoma 329
HLA 419

Hodgkin's disease 205

Idiotype 157
IgE 63
Immune complexes 329
Immune reactivity
– thymic 79
Immunity 163
– cell-mediated 289
– tumor 63, 283
Immunization
– in vitro 294
Immunoconjugate 90
– radio 252
Immunomodulation 228
Immunomodulator
– PSK 133
Immunotherapy 43, 186, 306, 349, 424
– adoptive 53
– chemo- 279, 383
– radio 71
Immunotoxins 24, 198
Interferon β 115
Interferon γ 49, 169, 289, 393, 414
Interleukin 306
– human recombinant 9
Interleukin-1 123
Interleukin-2 49, 74, 111, 175, 259, 279, 289, 337, 383, 424
Interleukin-6 228

LAK
– activity 259
– cells 31, 272
– migration 221
Leukemia 393
– acute myeloid 337
– B cell 181
– hairy cell 115
– L1210 279
– radiation, virus-induced 133
LFA-1 407
Liposomes 233
Liposomal therapy 211
L-phenylalanine methyl ester 31
Lymphocytes
– activated 349
– CD4+ 419
– CD8 181
– CD25+ 111
– cytotoxic T 419
– responses 128
– subsets 138
– T 1
– tumor infiltrating 241
Lymphokines 205
Lymphoma
– B cell 43
– cells 233

Mammary
– murine tumor virus 63
Measles virus 313
Melanoma 90, 163, 419
Melphalan 79
Metastases 169
Methotrexate 90
MHC 103
– class I 313

Monensin 24
Monoclonal antibody 37, 90, 97, 191, 198, 265, 294, 343, 407
Monoclonal gammopathy 157
Monocytes 31, 393
– human blood 355
Mononuclear cells 9, 175
Myelodysplastic syndromes 414

NK cell
– activity 17, 74
– cytotoxicity 299
Nocardia rubra cell-wall skeleton 389
Non-Hodgkin's lymphoma 123

Ocular squamous cell carcinoma 186
Osteosarcoma 211
Ovarian cancer 191

Paediatric tumors 241
Pharmacokinetics 169
Phorbol ester 272
Pleiotropic drug resistance 399
Polysaccaride K 133
Proteoliposomes 233

RadLV lymphoma 133
Radioimmunoconjugate 252
Radioimmunotherapy 71
Renal cell carcinoma 111, 289
RNA
– mismatched double-stranded 259

Sensitivity 321
Sizofiran 17
Spleen cells 103
Squamous cell carcinoma 252
– head and neck 329
– ocular 186
Sulfur mustard 389

T cell 133, 157, 181
– cytotoxic – line 53
– hyporesponsiveness 205
TGFβ 241
T helper cells 103, 138
Therapy 1
– liposomal 211
Thromboglobulin-β 175
Thymic immune reactivity 79
Toxicity 49
Toxins 198
Tumor
– activity 299
– cells 272, 355
– immunity 63, 283
– immunogenicity 313
– infiltrating lymphocytes 241
– murine 265, 407
– necrosis factor 49, 123, 306, 370, 393, 399
– rejection 103
– targeting 252
– murine 383
– vaccine 233

Vaccine
– BCG 306
Virus
– measles 313
– murine mammary tumor 63

Xenografts 191

Subject index of volume 34

Alkaline phosphatase 343
Antibody 221
– anti-idiotypic 43
– autologous 329
– bispecific 1
– derivatives 361
– monoclonal 37, 90, 97, 191, 198, 265, 294, 343, 377, 407

Growth modulation 355

Head and neck squamous cell carcinoma 329
HLA 419

Hodgkin's disease 205

Idiotype 157
IgE 63
Immune complexes 329
Immune reactivity
– thymic 79
Immunity 163
– cell-mediated 289
– tumor 63, 283
Immunization
– in vitro 294
Immunoconjugate 90
– radio 252
Immunomodulation 228
Immunomodulator
– PSK 133
Immunotherapy 43, 186, 306, 349, 424
– adoptive 53
– chemo- 279, 383
– radio 71
Immunotoxins 24, 198
Interferon β 115
Interferon γ 49, 169, 289, 393, 414
Interleukin 306
– human recombinant 9
Interleukin-1 123
Interleukin-2 49, 74, 111, 175, 259, 279, 289, 337, 383, 424
Interleukin-6 228

LAK
– activity 259
– cells 31, 272
– migration 221
Leukemia 393
– acute myeloid 337
– B cell 181
– hairy cell 115
– L1210 279
– radiation, virus-induced 133
LFA-1 407
Liposomes 233
Liposomal therapy 211
L-phenylalanine methyl ester 31
Lymphocytes
– activated 349
– CD4+ 419
– CD8 181
– CD25+ 111
– cytotoxic T 419
– responses 128
– subsets 138
– T 1
– tumor infiltrating 241
Lymphokines 205
Lymphoma
– B cell 43
– cells 233

Mammary
– murine tumor virus 63
Measles virus 313
Melanoma 90, 163, 419
Melphalan 79
Metastases 169
Methotrexate 90
MHC 103
